NETWORK ENGINEER

Results-oriented aspiring Network Engineer with a strong foundation in designing, implementing, and managing reliable and secure network infrastructures. Skilled in TCP/IP, routing, switching, and network security, with hands-on experience using Cisco Packet Tracer, Wireshark, Nmap, and Postman. Demonstrates practical knowledge of network scanning, API testing, and performance monitoring using tools such as Nagios and SolarWinds. Possesses strong troubleshooting abilities and analytical thinking to optimize network performance. Combines technical expertise with leadership experience to effectively contribute in team-driven environments and support organizational network operations.

KEY COMPETENCIES

TCP/IP, OSI, Subnetting
Firewall, VPN, Access Control
Wireshark, Nagios, SolarWinds
RIP, OSPF, VLANs

Nmap, Postman
Cisco Packet Tracer, GNS3
Linux, Windows

Team leadership
Communication
Operations management
Troubleshooting & Problem Solving

PROFESSIONAL EXPERIENCE

Network Traffic Analyzer (Python Desktop Application) Python, Tkinter, Scapy

March | 2026

- Developed a desktop-based tool to analyze and visualize PCAP/PCAPNG network traffic with packet inspection (IP, protocol, ports)
- Implemented protocol distribution and timeline visualization to monitor traffic patterns and detect anomalies (e.g., abnormal ports, scanning)
- Utilized Scapy for packet parsing and designed a modular architecture for future enhancements

NetSlice Pro – Network Subnetting & Analysis Tool Python, Tkinter, PyInstaller

february | 2026

- Developed a Python-based tool for IPv4 network analysis including subnetting (CIDR), VLSM, route summarization, and overlap detection
- Implemented subnet calculation by host/count with proper power-of-2 alignment and added reverse DNS functionality
- Built GUI (Tkinter) and CLI versions, packaged as a standalone executable for cross-platform usage

IoT Home Automation System (Arduino Nano) Arduino Nano, IoT Sensors, Embedded Systems

August | 2025

- Developed a desktop-based tool to analyze and visualize PCAP/PCAPNG network traffic with packet inspection (IP, protocol, ports)
- Implemented protocol distribution and timeline visualization to monitor traffic patterns and detect anomalies (e.g., abnormal ports, scanning)
- Utilized Scapy for packet parsing and designed a modular architecture for future enhancements

MediManage – Smart Medical Billing & Inventory System Java, JavaFX, MySQL, Python (AI/ML)

December | 2025

- Developed a pharmacy management system with billing, inventory tracking (FIFO), expiry alerts, and GST-compliant invoicing
- Integrated AI modules for prescription OCR/NLP, medicine recommendation, and demand forecasting using Python (spaCy, scikit-learn)
- Built a full-stack architecture (JavaFX + REST + Python AI engine) with intelligent search, risk alerts, and decision support

Computer Lab Management & Network Setup

May 2023 - Nov 2026

OS Installation, Networking, Hardware

- Managed computer lab systems including OS installation, software setup, and system configuration across multiple machines
- Performed physical network setup including RJ45 cable crimping, LAN connectivity, and basic network troubleshooting
- Supported lab operations by maintaining system performance, resolving hardware/software issues, and ensuring network availability

EDUCATION

B.Tech in Computer Science and Engineering

Jawaharlal Nehru Technological University Anantapur College of Engineering Kalikiri

CGPA: 7.45

Diploma in Computer Engineering

Government Polytechnic College Dharmavaram

CGPA: 79.69%

CERTIFICATIONS

CCNA Training (Course Completion) – Mohan's Networking Institute

Networking Basics – Cisco Networking Academy (NetAcad)

Networking Certification – Infosys Springboard

Python Programming Certification – GeeksforGeeks

INTERNSHIPS

Frontend Developer Intern – AI Zira Technology

React.js, APIs, Web Development | 2025

- Developed and optimized responsive UI components using React.js for a production website
- Integrated REST APIs to fetch and display dynamic data, improving user interaction
- Enhanced performance and user experience through efficient state management and UI optimization

Java Full Stack & Cloud Intern – Skill Dzure (CodeTech Program)

Java, Spring Boot, React.js, MySQL, REST APIs, Cloud Basics | 2025

- Developed full-stack applications using Spring Boot (backend) and React.js (frontend) with REST API integration and MySQL database
- Built and structured multiple tasks/projects focusing on clean code, debugging, and performance optimization
- Gained hands-on experience in Git workflows, API integration, and basic cloud deployment concepts
